FC15M MEDICAL CAPACITOR CHARGING
AND ACDC POWER SUPPLY

FLEXICHARGE
by Advanced Energy

Advanced Energy's FC15M medical capacitor charging power supply, with a built in configurable ACDC power supply is designed to provide the system power needs for medical laser applications. The FC15M can provide both capacitor charging and ACDC low voltage system power due to it's unique design and intelligent control. The FC15M can be used as a standalone capacitor charger, and if needed, various low voltage modules can be added to the unit to provide further system power. This functionality provides extra flexibility to power other systems and applications. The supply can support analog and digital control using our PMBus interface.
